The amounts shown above represent the estimated per-share income and capital gain distributions as of September 30, 2026. The per-share information is based on net assets and shares outstanding as of October 31, 2026. The estimated income distributions do not include projected income through December 2026. Any income earned by a fund's wholly-owned foreign subsidiary is reflected in the estimated net income distributions. Estimated distributions can change prior to the record date depending on current market conditions and the number of fund shares outstanding.

All mutual funds, regardless of performance, must distribute to shareholders any net realized gains from the sale of portfolio investments. Generally speaking, market appreciation increases the likelihood that a fund will distribute capital gains. There is also the potential that a fund will pay a capital gain distribution during a year of negative or market neutral performance. Past distributions are not indicative of future trends.

A fund's closing net asset value (NAV) on the ex-dividend date will be reduced by the amount of the distribution, plus or minus any market activity for the day. Please consult your tax advisor for information specific to your particular situation.
