About the Fund

Investment Objective:

Seeks total return.

Reasons to Invest:

The Fund seeks to provide exposure to international stock markets with lower volatility than its stock market benchmark.

The Fund's strategy seeks to provide downside protection with upside potential through active stock selection, risk management and diversification.

Potential Advantages:

Experienced Management Team

AQR's core investment and research team has been together since the early 1990s.

Cutting Edge Research

AQR is a thought leader on low-risk, high-quality investing with an ongoing commitment to research and development.

Investment Approach

- The Fund pursues a "defensive" strategy that provides exposure to international stock markets with lower volatility and draw-downs relative to its stock market benchmark through active stock selection, risk management and diversification.
- The investment universe for the Fund is comprised of international equities, including large-cap, mid-cap and small-cap companies.
- The Fund seeks to invest in lower beta stocks of companies with stable businesses, high profitability, low operating and financial leverage, lower earnings-per-share variability and other measures of quality.
- These stocks generally are less volatile than the market average, and are expected to produce higher risk-adjusted returns over a full market cycle than market indexes.
- The Fund utilizes a proprietary optimization process and a number of sophisticated trading techniques to manage transaction costs.

PRINCIPAL RISKS

An investment in the Fund is subject to risks, including the possibility that the value of the Fund's portfolio holdings may fluctuate in response to events specific to the companies in which the Fund invests, as well as economic, political or social events in the U.S. or abroad. Foreign investments often involve special risks not present in U.S. investments that can increase the chances that the Fund will lose money. Currency risk is the risk that changes in currency exchange rates will negatively affect securities denominated in, and/or receiving revenues in, foreign currencies. Common stocks are subject to greater fluctuations in market value than certain other asset classes as a result of such factors as a company's business performance, investor perceptions, stock market trends and general economic conditions. Funds that emphasize investments in small and mid-cap companies generally will experience greater price volatility. The use of derivatives, including forward and futures contracts, exposes the Fund to additional risks including increased volatility, lack of liquidity, and increased transaction costs. The Adviser from time to time employs various hedging techniques, it is not possible to hedge fully or perfectly against any risk, and hedging entails its own costs.

This Fund is not suitable for all investors. An investor considering the Fund should be able to tolerate potentially wide price fluctuations. There are risks involved with investing including the possible loss of principal. Past performance does not guarantee future results. Diversification does not eliminate the risk of experiencing investment losses. Please refer to the Prospectus or Summary Prospectus for additional information regarding risks associated with the Fund. An investor should consider the investment objectives, risks, charges and expenses of the Fund carefully before investing. To obtain a Prospectus or Summary Prospectus containing this and other information, please call 1-866-290-2688 or visit <https://funds.aqr.com>. Read the Prospectus carefully before you invest. There is no assurance the stated objectives will be met.
