Adjusted Expense Ratio***

Class I Shares: 0.90%	Class N Shares: 1.15%	Class R6 Shares: 0.80%
-----------------------	-----------------------	------------------------

***Reflects the Net Expense Ratio adjusted for certain investment related expenses, such as interest expense from borrowings and repurchase agreements and dividend expense from investments on short sales, incurred directly by the Fund, none of which are paid to the Adviser.

About the Fund

Investment Objective:

Seeks positive absolute returns.

Reasons to Invest:

Uncorrelated Source of Return

The Fund seeks to provide long-term returns with a low correlation to traditional asset class returns by investing in a broad spectrum of asset classes and markets.

Multi-asset, Multi-style Approach

The Fund employs a market-neutral, long/short strategy across five asset groups and four distinct investment styles.

Potential Advantages:

Breadth of Styles

The Fund invests across four investment styles: value, momentum, carry and defensive. Each style is backed by economic theory and decades of academic research.

Disciplined Strategic Allocation

The Fund is risk-balanced across both investment styles and asset classes seeking to limit exposure to poor performance within any single style or asset class.

Experienced Management Team

AQR senior management has been working together and implementing complex alternatives since the mid-1990s.

Trading Infrastructure

Customized liquidity-providing algorithms seeking to minimize transaction costs.

Cutting Edge Research

Ongoing commitment to research and development.

Investment Approach

Investment Universe of the Fund

The investment universe of the Fund is chosen to maximize the breadth of the universe while focusing exclusively on liquid assets. The Fund applies market-neutral, long/short style strategies across five different asset groups:

Stocks & Industries – Approximately fifteen hundred stocks across major markets

Equity Indices – Twenty-one equity indices from developed and emerging markets

Fixed Income – Bond futures across six markets; short-term interest rate futures in four markets

Currencies – Twenty-two currencies in developed and emerging markets

Commodities – Eight commodity futures

Investment Styles Included in the Fund

A style is a disciplined, systematic method of investing that aims to produce long-term positive returns across markets and asset groups, backed by robust data and economic theory. The Fund employs the following four classic styles:

Value – The tendency for relatively cheap assets to outperform relatively expensive ones

Momentum – The tendency for an asset's recent relative performance to continue in the future

Carry – The tendency for higher-yielding assets to provide higher returns than lower-yield assets

Defensive – The tendency for lower risk and higher-quality assets to generate higher risk-adjusted returns

Advanced Portfolio Construction

AQR employs several sophisticated techniques to implement a portfolio that both efficiently harvests returns and effectively manages risk.

Balanced allocation – Actively maintained across both styles and across asset classes

Risk targeting – Targets a consistent level of volatility in changing market conditions

Style agreement – Allows for the risk levels of asset classes to vary depending on the degree of agreement across styles

Non-directionality – Allows for hedging should any strategy take on conditional correlations to equity markets

Efficient execution – Utilizes proprietary, time-tested algorithms to minimize trading costs

PRINCIPAL RISKS:

The use of derivatives, forward and futures contracts, and commodities exposes the Fund to additional risks including increased volatility, lack of liquidity, and possible losses greater than the Fund's initial investment as well as increased transaction costs. Concentration generally will lead to greater price volatility. This fund enters into a short sale by selling a security it has borrowed. If the market price of a security increases after the Fund borrows the security, the Fund will suffer a potentially unlimited loss when it replaces the borrowed security at the higher price. Short sales also involve transaction and other costs that will reduce potential Fund gains and increase potential Fund losses.

An investor considering the Fund should be able to tolerate potentially wide price fluctuations. The Fund is subject to high portfolio turnover risk as a result of frequent trading, and thus, will incur a higher level of brokerage fees and commissions, and cause a higher level of tax liability to shareholders in the funds. The Fund may attempt to increase its income or total return through the use of securities lending, and it may be subject to the possibility of additional loss as a result of this investment technique.

This Fund is a non-diversified fund. Because the Fund may invest in securities of smaller numbers of issuers, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer than a fund that invests more widely, which may, therefore, have a greater impact on the Fund's Performance.

This Fund is not suitable for all investors. There are risks involved with investing including the possible loss of principal. Past performance does not guarantee future results. Diversification does not eliminate the risk of experiencing investment losses. This document is intended exclusively for the use of the person to whom it has been delivered by AQR and it is not to be reproduced or redistributed to any other person without AQR's written consent.

Please refer to the prospectus or summary prospectus for complete information regarding all risks associated with the fund. An investor should consider the investment objectives, risks, charges and expenses of the fund carefully before investing. To obtain a prospectus or summary prospectus containing this and other information, please call 1-866-290-2688 or download the file from www.aqrfunds.com. Read the prospectus carefully before you invest. There is no assurance the stated objectives will be met.
