AQR Large Cap Relaxed Constraint Equity Fund
As of December 12, 2016

Loosening the Long-Only Leash
Unlike long-only portfolios, relaxed-constraint strategies allow for a limited amount of shorting, which can provide greater return potential by amplifying the expression of both negative and positive views.

Opportunity to Outperform
The Fund invests 130% of the portfolio’s assets long and 30% short, maintaining 100% net exposure to the market. The ability to have larger over- and underweights relative to the benchmark may provide greater return potential than a traditional long-only fund.

Disciplined Investment Process
The Fund uses a systematic, rules-based approach to select stocks for the portfolio. The result is a Fund constructed without emotion, based on historically proven drivers of returns such as value, momentum, quality and other proprietary factors.

Broadly Diversified Portfolio
The Fund invests in the full spectrum of stocks across the U.S. large and mid-cap universe. It seeks to benefit from holding numerous small and moderate-sized active positions, rather than fewer, more concentrated bets.

By Relaxing the Long-Only Constraint, the Fund Allows Greater Exposure to Manager Views

AQR Large Cap Relaxed Constraint Equity Fund

Fund Objective
The AQR Large Cap Relaxed Constraint seeks long-term capital appreciation by over- and underweighting securities, industries, and sectors relative to the Russell 1000 Index.

Investor Profile
This Fund may be suitable for investors seeking:

- Potential to outperform the Russell 1000 Index
- An alternative approach to traditional portfolios
- Diversified exposure to large-cap equities

About the Manager

- AQR has been managing relaxed-constraint portfolios since 2006.
- AQR’s investment and research team has been managing complex long-only and long-short strategies since the early 1990s.
- Investment philosophy grounded in academic research dating back to the late 1980s.

PRINCIPAL RISKS:
This Fund is not suitable for all investors. An investor considering the Funds should be able to tolerate potentially wide price fluctuations. The Funds may attempt to increase its income or total return through the use of securities lending, and they may be subject to the possibility of additional loss as a result of this investment technique.

An investment in the Fund is subject to risks, including the possibility that the value of the Fund’s portfolio holdings may fluctuate in response to events specific to the companies in which the Fund invests, as well as economic, political or social events in the United States or abroad. This Fund is newly-formed and has a limited operating history. Diversification does not eliminate the risk of experiencing investment losses.

Derivatives may be more sensitive to changes in economic or market conditions than other types of investments; this could result in losses that significantly exceed the fund’s original investment.

The Russell 1000 Growth Index measures the performance of those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values. The Russell 1000 Index measures the performance of the 1,000 largest companies in the Russell 3000 Index. One cannot invest directly in an index.

An investor should consider the investment objectives, risks, charges and expenses of the Fund carefully before investing.
