About the Fund

Investment Objective:

Long-term capital appreciation.

Reasons to Invest:

Seeks to outperform the Russell 2000 Index of U.S. small-cap stocks.

Invests primarily based on three proven investment styles: value, momentum and quality.

By diversifying across distinct investment styles, the Fund seeks to provide more consistent returns.

Potential Advantages:

Systematic, Repeatable Process Style investing is a systematic, repeatable process that seeks to efficiently harvest the returns to value, momentum and quality.

Academic Research Foundation

Decades of academic and practitioner research have shown that investing in stocks based on value, momentum and quality may provide returns in excess of market benchmarks.

Experienced Management Team

AQR senior management has been working together and implementing style-based portfolios since the mid-1990s.

Investment Approach

- The Fund seeks to invest in stocks of attractively valued U.S. small-cap companies that have positive momentum and strong profitability.
- The advisor follows a disciplined, systematic approach that employs multiple measures of value, momentum and quality.
- The advisor ranks each stock's attractiveness for each of these three systematic styles, and selects those with a high combined score.
- The Fund's integrated approach seeks to offer a diversified, well-constructed core investment strategy that may provide returns consistently in excess of the overall market.
- Combining exposures to all three styles in an integrated portfolio can help reduce portfolio turnover and minimize transaction costs

An investment in the Fund is subject to risks, including the possibility that the value of the Fund's portfolio holdings may fluctuate in response to events specific to the companies in which the Fund invests, as well as economic, political or social events in the U.S. or abroad. Common stocks are subject to greater fluctuations in market value than certain other asset classes as a result of such factors as a company's business performance, investor perceptions, stock market trends and general economic conditions. Funds that emphasize investments in small-cap companies generally will experience greater price volatility. The use of derivatives, including forward and futures contracts, exposes the Fund to additional risks including increased volatility, lack of liquidity, and increased transaction costs

The Fund is not suitable for all investors. An investor considering the Fund should be able to tolerate potentially wide price fluctuations. There are risks involved with investing including the possible loss of principal. Past performance does not guarantee future results. Diversification does not eliminate the risk of experiencing investment losses.
